PREFACE.

This is the thirty-fifth consecutive year that Geer's Hartford City Directory has been published. From a small pamphlet of 72 pages, 2¾ by 5 inches in size and 1625 names with only 10 pages of lists of corporations, societies, &c., it has steadily increased each year, until now we present our patrons with a large octave volume of about 300 pages, 5 by 8 inches in size, containing nearly 15000 names; also 78 pages of a Business Directory, Corporations, Societies, etc. Besides, in four pages of our present list of Corporations, Societies, &c., there is as much information as was contained in the whole of the like portion of our Directory thirty years ago. Herein will be found the great epitome of the business of Hartford, together with all kinds of information desired by citizens or strangers in such a work as this.

We have added a new and very artistic Map of Hartford, which has been drawn and engraved expressly for this Directory. We also embellish our issue this year with Engravings of all the church Edifices in Hartford, also Engravings of some other public buildings; together with valuable statistics and information, too voluminous to enumerate in a preface—see contents of this work.

The canvass of Hartford City this Spring shows a net increase of 1042 names over that of last year. We have noted from our last year's Directory 2761 removals, alterations, &c., and erased 2189 names, and have added 3231 new names; the number in this year's Directory being 14618 names. This shows, with the Business Directory changes from last year, 9355 instances where last year's Directory will mislead persons who may refer thereto; and about as many more changes in corporations, societies, &c.

In our Business Directory, this year, we have added the names of 483 new firms, or individuals beginning business for themselves, and erased 299; showing a large net business increase of 184 firms the last year; also have noted 392 removals and changes from our last year's Business Directory; thus showing 1174 changes in business firms in this City during the past 12 months.

Look at these facts, and then judge for yourselves of the little present value of a last year's Directory for reference in a city growing so rapidly as Hartford—examine *this* work, and peruse the vast amount and variety of information, then you will perceive the necessity of having one copy at your residence for the information of your family and visiting friends, as well as one at your place of business, of No. 35 of Geer's Hartford City Directory.

The following table of the number of names contained in each number of this Directory since its first publication, shows the steady, rapid, and permanent growth of the City of Hartford:—

Years.	Names.	Years.	Names.	Years.	Names.	Years.	Names.	Years.	Names.	Years.	Names.
1838,	1625	1844,	3140	1850,	4963	1856,	6326	1862,	8683	1868,	10276
1839,	1631	1845,	3150	1851,	5361	1857,	6377	1863,	9115	1869,	11291
1840,	1797	1846,	3096	1852,	5877	1858,	7030	1864,	9354	1870,	12345
1841,	1818	1847,	3175	1853,	6093	1859,	7196	1865,	9382	1871,	13576
1842,	2300	1848,	3810	1854,	6127	1860,	8428	1866,	10089	1872,	14618
1843,	2890	1849,	4170	1855,	6175	1861,	8471	1867,	10127		

The amount of labor we have annually bestowed upon the preparation of this work cannot be appreciated by the uninitiated; some faint idea however may be obtained of it from the fact that each person's name, every corporation, society, etc. is not inserted in *this* Directory unless re-procured every year. To this fact one or more persons in every family, and some one officer in each corporation, society, &c. can bear witness. In calling at every tenement in this city annually no less than nine distinct *facts* concerning each individual's name has to be ascertained and noted down, viz. the christian name—the middle name—the surname—the occupation—the business—at what number—in what street—and does he or she keep house or boards—and at what number and street. Now multiply these 14618 names by nine and we have 133,962 facts procured for the names, on only 116 of these pages. Then add thereto the facts collated in our Business Directory, List of Streets, Corporations, Churches, Societies, &c., and these will make an aggregation of over 310,000 facts stated in this work. Remember also, that after all this amount of laborious statistics is obtained, then comes the additional labors of transcribing the same for the compositor—then to be set up in type—then proof read—then arranged alphabetically—then into pages—then printed for the binder. Now after all this transmutation of the information first procured at residences, is it strange that an occasional mistake should occur in some of these 310,000 facts? Yet the errors that we have heretofore been able to trace out we have found in nine cases out of ten have been made by persons giving us the information. For any mistake you may discover just give us the credit against each of such errors, the many thousands of correct statements: also ask yourself, if you have the patience or ability to do such work even as well. We do not believe that the citizens of any other city have had heretofore or will have this year a more full, correct or reliable Directory, than the citizens of Hartford have had annually in Geer's Hartford City Directory.

The enlargement of our book places nearly three times as many names before the eyes of the reader upon each leaf as has been heretofore given—thus economizing two-thirds of the time of every person whenever looking over this book for information. Besides, this improvement solidifies and utilizes the work and makes it more in unison with what a City Directory should be.

PREFACE.

This is the THIRTY-FIFTH consecutive year that Gerry's Hartford City Directory has been published. From a small pamphlet of 72 pages, 8¾ by 5 inches in size and 1620 copies, with only 10 pages of lists of corporations, societies, &c., it has steadily increased every year, until now we present our patrons with a large octavo volume of about 500 pages, 9 by 6 inches in size, containing nearly 18000 names; also 75 pages of a Business Directory, Corporations, Societies, &c. Besides, in four pages of our annual list of Corporations, Societies, &c., there is a small information as was contained in the whole of the like portion of our Directory thirty years ago. Herein will be found the great opinions of the business of Hartford, together with all kinds of information desired by citizens or strangers in such a work as this.

We have added a new and very artistic Map of Hartford, which has been drawn and engraved expressly for this Directory. We also embellish our issue this year with Engravings of all the church edifices in Hartford, also Engravings of some other public buildings, together with valuable statistics and information, too voluminous to enumerate in a preface—see contents of this work.

The canvass of Hartford City this Spring shows a net increase of 1042 names over that of last year. We have noted from our last year's Directory 1701 removals, alterations, &c., and erased 2189 names, and have added 3231 new names; the number in this year's Directory being 18415 names. This shows, with the Business Directory changes from last year, 3933 instances where last year's Directory will mislead persons who may refer thereto; and about as many more changes in corporations, societies, &c.

In our Business Directory, this year, we have added the names of 459 new firms or individuals legitimating business for themselves, and erased 209; showing a large net business increase of 134 firms the last year; also have noted 302 removals and changes from our last year's Business Directory; thus showing 1174 changes in business firms in this City during the past 12 months.

Look at these facts, and then judge for yourselves of the little pecuniary value of a last year's Directory for reference in a city growing so rapidly as Hartford—examine this work, and peruse the vast amount and variety of information, then you will perceive the necessity of having one copy at your residence for the information of your family and visiting friends, as well as one at your place of business, of No. 55 of GERRY'S HARTFORD CITY DIRECTORY.

The following table of the number of names contained in each number of this Directory since its first publication, shows the steady, rapid, and permanent growth of the City of Hartford:—

Years.	Names.	Years.	Names.	Years.	Names.	Years.	Names.	Years.	Names.
1838,	1620	1844,	3140	1850,	3964	1856,	6000	1862,	8323
1839,	1881	1845,	3146	1851,	4381	1857,	6027	1863,	8178
1840,	1707	1846,	3095	1852,	5877	1858,	7070	1864,	8994
1841,	1816	1847,	3176	1853,	5093	1859,	7100	1865,	9909
1842,	2500	1848,	3810	1854,	6137	1860,	8128	1866,	10600
1843,	2500	1849,	4170	1855,	6173	1861,	8171	1867,	10237

The amount of labor we have annually bestowed upon the preparation of this work cannot be appreciated by the uninitiated; some faint idea however may be obtained of it from the fact that each person's name, every corporation, society, etc., is not inserted in this Directory unless re-procured every year. To this fact one or more persons in every family, and some one officer in each corporation, society, &c. can bear witness. In calling at every tenement in the city annually on less than nine distinct days concerning each individual's name that is to be ascertained and noted down, viz. the christian name—the middle name—the surname—the occupation—the residence—at what number—in what street—and does he or she keep house or board—and at what number and street. Now multiply these 18415 entries by nine and we have 165,735 facts procured for the same, on only 116 of these pages. Then add thereto the items collated in our Business Directory, List of Schools, Corporations, Churches, Societies, &c., and these will make an aggregation of over 310,000 facts stated in this work. Remember also, that after all this amount of laborious statistics is obtained, then comes the additional labors of transcribing the same for the compositor—then to be set up in type—then proof read—then arranged alphabetically—then into pages—then printed for the binder. Now after all this transcription of the information that procured at residences, is it strange that an occasional mistake should occur in some of these 310,000 facts? Yet the errors that we have heretofore been able to trace out, we have found in nine cases out of ten have been made by persons giving us the information. For any mistake you may discover but give us the errors, by personally, the many thousands of correct statements also ask yourself if you have the patience or ability to do such work even as well. We do not believe that the citizens of any other city have had heretofore or will have this year a more full, correct or valid Directory, than the citizens of Hartford have had annually in GERRY'S HARTFORD CITY DIRECTORY.

The enlargement of our last place nearly three times as many names before the eyes of the reader upon each leaf as has been heretofore given—this commanding two-thirds of the time of every person whenever looking over this book for information. Besides, this improvement alleviates and utilizes the work and makes it more in unison with what a City Directory should be.

The alphabetical arrangements of the names we believe will be found superior to even our former efforts in this line. To the several suggestions made to us by different person, by letter, etc. to arrange the names of the same family according to their ages; also the names of sons to come immediately under that of their father's respectively; also to arrange the names according to numbers on the houses, streetwise, instead of alphabetically, as we have for over thirty years, we here answer all such persons that from our experience in Directory matters, each and all these suggestions are wholly impracticable to the public utility of a Directory—which impracticability appears so evident on the face of each, that a refutation therof we deem supererogatory.

As an illustration of the rapid increase of population in this city, we are informed by one of the Registrars of Electors, that in his annual registration in February last, he found 65 new unoccupied tenements in North street. And in three months thereafter in canvassing for this Directory, he found all but eight of those tenements occupied. This is a specimen all over the city.

There are a great number of names that appear to be duplicates, but which are not, although alike. The number of persons of the same name is very large in this and every other city. For illustrations, we have two James Caughlan's—both at 11 Wells street, and both same occupation. We have two John Kinney's, both at 5 Kilbourn—one a laborer the other a belt maker. We found a William Baron, engraver, h. 69 Retreat, and a William Baron, 69 Willard—the latter over 90 years of age. We could extend the illustrations to pages.

GUIDE TO THE LOCATION AND NUMBERS

OF

STREETS AND AVENUES

IN THE CITY OF HARTFORD.

The streets running north and south are invariably numbered from the south except Wethersfield avenue and Seymour street numbering from the north; those running east and west are numbered from Main street, or from the end of the street pointing thereto. Odd numbers on the SOUTH *and* WEST *sides, uniformly.*

The names of all streets running north and south (except Main and Broad,) change at Park river, and all east and west at crossing Main street.

This Guide indicates at a glance the proximate locality of any required number on any street; for example, if you desire to know about where No. 120 Albany street is located, this guide shows you that, being an even number, it will be found on the north side, and about mid-way between Williams and Green streets. This feature of this Directory, will be found of great practical convenience.

EXPLANATIONS.

THE business location of individuals engaged in business for themselves, is first mentioned in connection with their names, and then their place of residence. Especial pains has been taken to ascertain the name, residence and occupation of every male person, twenty one years of age and upwards. But when mistakes or omissions have occured, in previous issues, in nine cases out of ten, they have been caused by those giving the information.

When two numbers are given in connection with one name, and only one street mentioned, the number first given is the place of business, and the second the residence, and both in the same street.

The letter h. signifies house; st. street; b. boards; av. avenue; r. rear; u. upper tenement; l. lodges or rooms at; pl. place; ct. court; rd. road; &c.

We have ommitted at the end of each line, av. pl. and ct. except in cases where streets or avenues have the same name. Therefore where the residences of individuals are put down as at New Britain, Farmington, Suffield, etc., the word avenue is understood to follow—being left off from lack of room on many of the lines.

PHŒNIX MUTUAL LIFE INSURANCE COMPANY,

HARTFORD, CONN.

POLICIES ISSUED, 1871, 10,039. INCOME, 1871, $3,135,736.14

THE ONLY OLD COMPANY OF CONSIDERATION THAT HAS INCREASED ITS BUSINESS IN 1871.

ASSETS, securely invested, - - - - - **$7,510,614.05**
SURPLUS, free of all liabilities, - - - - - **1,557,822.77**
DIVIDENDS, paid to Policy Holders during the year, **663,654.22**
INCOME, for the year, - - - - - - **3,135,736.14**

The following table exhibits the progress of the Company during the last ten years.

	POLICIES ISSUED.	INCOME.	DIVIDENDS PAID POLICY-HOLDERS.	LOSSES BY DEATH.	ASSETS.
1862 and 1863,	1,717	$ 125,672	$ 1,244	$ 58,600	$ 437,933
1864 and 1865,	6,599	789,733	2,388	117,200	903,285
1866 and 1867,	9,919	2,027,651	50,222	196,050	2,218,344
1868 and 1869,	16,852	4,363,812	461,716	502,544	5,081,975
1870 and 1871,	19,105	5,963,392	1,162,412	1,153,056	7,510,614

An examination of the above figures shows that the Company is a progressive one, that it guarantees ample security to its Policy Holders, and that it affords insurance at the lowest rates. It appears, also, that within the last ten years it has paid to its Policy Holders, in Dividends, nearly

ONE MILLION SEVEN HUNDRED THOUSAND DOLLARS,

And in Losses by Death, more than

TWO MILLION DOLLARS,

And at the same time it has greatly increased its Assets, as well as maintained a large Surplus over all Liabilities.

Since the commencement of its business, the Company has issued over

SIXTY-ONE THOUSAND POLICIES,

And has paid to the families of its deceased members, more than

TWO AND A HALF MILLION DOLLARS.

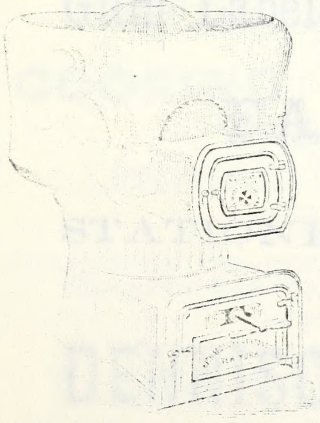
In the BOYNTON GAS-TIGHT FURNACE, we claim to have gained the following *great improvements* over all others:—



1st. The Boynton Gas-Tight Self-Clearing Furnace, from its peculiar constructed joints, IS PERFECTLY GAS TIGHT.

2d. It IS SELF-CLEARING.

3d. It is more durable than any other, less liable to crack or burn out, being made *extra heavy* in all parts exposed to wear.

4th. It has no complicated draft dampers. Can be understood by the most careless of servants.

5th. For economy of Fuel, power of Heating, and general operation, we place it AS EQUAL, if not superior to any other Furnace in the market.

6th. Its sales to-day exceed those of any other Furnace in the United States.

7th. It is adapted to all classes of private and public buildings.

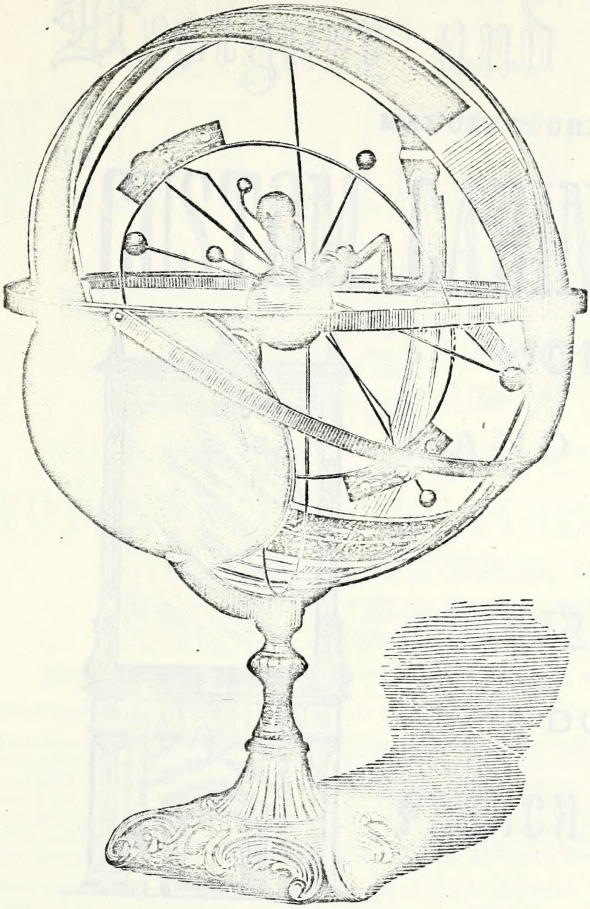
BRYANT'S CELESTIAL INDICATOR.



THIS is a new apparatus for facilitating the study of Astronomy. It is intended to illustrate clearly to children and to adults the various phenomena of the heavenly bodies,—the motion of the earth around the sun, and the changes of the seasons; the earth's axial motion; the precession of the equinoxes; nutation; tides; eclipses, both solar and lunar; the change of the pole star; changes in the declination and right ascension of stars; the difference between the sideral and tropical years; the retrogradation of the signs of the zodiac; the revolution of the moon's nodes, etc.

Accompanying the apparatus is a short Treatise on Astronomy, descriptive of the same, and illustrating how to use the instrument. An hour's time will enable the teacher to become familiar with the subject and with the instrument, and impart more information by illustration, with the ***Indicator***, than is usually gained by pupils during their entire course.

The apparatus is made of brass; is simple and durable in construction; not liable to get out of order. It occupies about a cubic foot, and is carefully boxed for shipment to any part of the country.

PRICE, - - - $25.00

"WE have used BRYANT'S CELESTIAL INDICATOR for some time, and find it able to do all which its inventor claims for it, and even more.

JOHN W. ARMSTRONG, D. D., Principal Fredonia Normal School, N. Y."

"I wish it might be placed in every institution where any attempt is made to teach Astronomy.

E. C. BEACH, A. M., Prof. in Mathematics and Astronomy, Ripon College, Wis."

"It ought to have a very extensive sale and come into general use.

FOR PERFECT CLEANLINESS, PERFECT COMFORT, and PERFECT DURABILITY,

The Company claim that this PERFECT SPRING BED WITHOUT SPRINGS has NO RIVAL.

The Mattress consists of 8000 feet of 18½ wire, made into perfect coils, and at the same time interlocked by an ingenious process of Double Weaving, by which a fabric half an inch thick is formed, which, when it is stretched on its frame by machinery, forms a bed of remarkable elasticity and strength.

The Wire Mattress is a **COMPLETE REVOLUTION** of ordinary ideas as to beds, being a **Perfect Sleeping Arrangement** in itself, in hot weather, with a blanket or any light covering thrown over the wires. For ordinary use, however, a thin hair mattress is desirable: but this is the only covering necessary and on this account the bed is the **Cheapest Article in Market.**

Read what **The N. Y. Independent** of March 9th, says:

"WHEN 'SLEEP IS LIFE' TO ALL OF US, AND HEALTH AND HAPPINESS AS WELL, THE ONLY WONDER IS THAT SO MANY POOR ARTICLES ARE SOLD, SO LONG AS A **WIRE MATTRESS** CAN BE PROCURED; AND, RATHER THAN NOT HAVE ONE, WE SHOULD PREFER TO ECONOMISE IN SOMETHING ELSE, AND PAY THE SLIGHT ADDITIONAL EXPENSE OF SO PERFECT AN ARTICLE. **BUT THE COMPANY NEED MAKE NO APOLOGY FOR THE PRICE:** FOR ALTHOUGH THE FIRST COST IS SOMEWHAT MORE THAN THE COMMON SPRING, THESE BEDS ARE WORTH THE MONEY, AND MUCH OF THE SLIGHT ADDITIONAL EXPENSE CAN BE SAVED IN THE THIN COVERING NECESSARY."

All the VEXING REPAIRS usually necessary in almost every other bed, are avoided, and they are guaranteed

NEVER TO LOSE THEIR SHAPE OR NEED A REPAIR.

This wire fabric is as NOISELESS as India-Rubber Cloth, which is a strong recommendation to all nervous, restless sleepers. It is destined to be THE POPULAR BED of the country.

MANUFACTURED BY THE

WOVEN WIRE MATTRESS COMPANY,

OF HARTFORD, CONN.,

No. 35 PEARL STREET.

Sole Patentees and Manufacturers.

FOR PERFECT CLEANLINESS, PERFECT COMFORT, and PERFECT PERMANENCY.

The Company claim that this PERFECT SPRING BED WITHOUT SPRINGS has NO RIVAL.

The Mattress consists of 600 feet of 18 G wire, made into perfect coils, and at the same time, interlocked by an ingenious process of Double Weaving, by which a fabric half an inch thick is formed, which, when it is stretched on its frame by machinery, forms a bed of unmatchable elasticity and strength.

The Wire Mattress has **COVA'S PATENT REGULATOR** of contrary lines to stretch, being a **Perfect Sleeping Arrangement**, in itself, in hot weather, giving ventilation and light, allowing free access to the wires. Incomparably sweet, luxurious, a thin hair mattress is dispensed with, for the only necessary necessary, and on this account the bed is the **Cheapest Article in Market.**

Read what **The N. Y. Independent** of March 4th, says:

"WIRE SLEEP IS LIFE TO ALL OF US, AND HEALTH AND HAPPINESS AS WELL, THE ONLY WOVEN IS THE ONLY GOOD ARTICLE ARE SOLD, SO LONG AS **WOVEN WIRE MATTRESSES** CAN BE PROCURED, AND, RATHER THAN NOT HAVE ONE, WE WOULD PREFER TO LOCOMOTE IN SOMETHING ELSE, AND LAY THE BLAME ABOUTHOUT ENTIRELY. EXPERIENCE OF PERFECT AS ARTICLE. **BUT THE COMPANY'S WOVEN WIRE MATTRESS TO ALL OTHERS, FOR THE TRUE ECONOMY:** FOR ALTHOUGH THE FIRST COST IS SOMEWHAT MORE THAN COMMON STRING, THINK HERE ARE WORTH THE MONEY. AND MUCH OF THE SILENT ADMIRATIONAL EXPENSE CAN BE SAVED IS THE THIN COVERED MATTRESS."

All the VERING RECAMIES usually necessary in almost every other bed, are avoided, and they are eliminated

NEVER TO LOSE THEIR SHAPE OR NEED A REPAIR.

This wire fabric is an UNBREAKABLE or India-Rubber Cloth, which is a strong recommendation to all persons, unless sleepers. It is destined to be THE POPULAR BED of the country.

HISTORICAL SKETCH, Etc.

OF THE

CITY OF HARTFORD.

HARTFORD was first settled in 1635, by emigrants from Newtown, now Cambridge, Mass., and from Dorchester and Watertown; many of whom had come originally from Braintree, in the county of Essex, England. The locality had been explored in 1634, and some huts had been erected, in what is now Wethersfield, where a few men passed the winter of 1634-5. The main body of emigrants, however, came across the country to Chicopee, in Springfield, and thence down the river, traveling by compass. The journey occupied about a fortnight; the same distance is now traveled in four hours!

The present locality of Hartford was called by the Indians, Suckiaug.

The first settlers named it Newtown; but in 1636, it was formally named Hartford, after Hartford, now called Hertford, county town of Hertfordshire, England, and birth place of Rev. Samuel Stone.

Mr. Stone and William Goodwin received a deed of the land of the new settlement in 1636, from Sunckquassen or Sequassen, sachem of the Suckiaug tribe. This deed was lost, and the settlers repurchased the land of the Indians in 1670, taking a new deed for certainty's sake.

The Dutch had, in 1633, erected a fort which they named the House of Hope, on "Dutch Point," at the confluence of the Park and Connecticut rivers, within the present City of Hartford. But the Dutch were legislated out by the General Court of Connecticut, in 1654, and thus the new colony came entirely into the hands of the English.

The first town organization admitted "inhabitants," and even temporary residents, only by vote of town meeting. The officers were "townsmen," who answered to the present selectmen, but with more extensive authority; a town court, constable, town clerk, crier, fence viewers, chimney viewers, and highway surveyors; and a little after were added grand jurors and a jailor. There was a public market semi-weekly, and a public fair twice a year.

The first town meeting was in 1635, the year of settlement, and the first General Court of Connecticut was held the next year, 1636.

A BRIEF LIST OF OCCURRENCES IN HARTFORD.

The first church in Hartford came ready organized, from Cambridge, with its pastor, teacher, and ruling elder, Hooker, Stone and Goodwin, and its first house of worship was erected in 1638, Mr. Hooker's barn having served instead, up to that time.

The first war was the Pequot war, 1637; for which Hartford contributed forty-two out of ninety men, including commander and chaplain; besides a large share of provisions, &c. The first flouring mill, date uncertain, was very early erected near the present jail. In

HISTORICAL SKETCH, ETC.

OF THE

CITY OF HARTFORD.

1638, Ludlow, Haynes, Wolcott, Hopkins and Hooker, set about forming a written constitution which was finished in 1639; the first ever formed in America, and which embodies the main points of all our subsequent State constitutions and of the Federal constitution; to that Hartford may claim to have been the model for our whole republic. A school was in operation here as early as 1638; and in 1643, sixteen pounds a year were voted to the teacher. A house of correction was in operation in 1640. An inn was ordered by the General Court, and established in 1644, nearly opposite the Center church. It was from this inn that Capt. Wadsworth took the Charter, to conceal it from Andros, in 1687. The first colony emigrated from Hartford in 1645, and founded Farmington. Others succeeded; one founded Middletown in 1650: another founded Norwalk in the same year; and a third founded Hadley, in 1659. Hartford has sent out innumerable delegations, and single emigrants, ever since, to all parts of the world. Not less than seven hundred and fifty of her sons and daughters are now living in the single city of New York. In 1650, our first mission was organized, by order of the General Court; which directed a teaching elder and an interpreter to go among the Indians twice a year to endeavor to convert them. In 1650, also, our first code of laws was drawn up, chiefly by Roger Ludlow; which reduced the number of capital offences from the hundred and sixty of England, to about fifteen. In 1657, Gov. Hopkins left about £1,000, part of which endowed the Hartford Grammar School, yet in existence as the classical department of the Hartford High School. In 1687, the independent spirit of the colony was shown by the quiet but determined resistance made to Andros, in his attempt to take away the Charter of 1662; when the lights being put out by arrangement, in the room where Andros and the authorities had the Charter and were discussing it, Capt. Wadsworth carried it off in the dark and hid it so effectually in the hollow of the Charter Oak, that it could not be found. The charter was thus hid from October 31, 1687, to May 9, 1689. In October, 1693, Col. Fletcher came to Hartford to assume command over the Connecticut militia, and attempted to read his commission at the head of the train-band, but was foiled by Captain Wadsworth, who commanded the drums to beat, and told Fletcher that if interrupted again, he would make the sun shine through him in a moment. The first printing office was set up here by Thomas Green, in 1764, who established the Connecticut Courant in October, 1764. In 1775, a small committee of enterprising men met here and made those arrangements for raising men and money, which resulted in the taking of Ticonderoga by Ethan Allen "in the name of the Great Jehovah and the Continental Congress." In 1784 the city was incorporated. In 1792 the Hartford Bank and the Hartford Charitable Society were established. In 1790 a Woolen manufactory was started on Park river at foot of Gold street, then called Factory lane, but after trial by different parties was abandoned as a losing business. In 1797—9, the first steam locomotive ever made, was set running in Main street by Dr. Kinsley; also, inventor of the brick-pressing machine. The "Mansion house" on Kinsley street was built by him, with brick made by himself—probably the oldest *home*-pressed brick house in the United States. A few inches from the ground at its southeast angle, is the inscription "A. KINSLEY. 1796." In 1811 Elihu White removed his Type Foundry from this city to New York city, to whom Farmer, Little & Co. are his last successors. To a Hartford man, John I. Wells, was issued in 1819, the first patent for lever printing presses. Our oldest Insurance Company, the Hartford, was organized in 1810; and the Ætna, in 1819. The American Deaf and Dumb Asylum was chartered in 1816. Trinity College in 1823, the Retreat for the Insane in 1824, the Historical Society in 1825, reorganized 1839, the Orphan Asylum in 1833, the Young Men's Institute, in 1839 succeeding the Hartford Library Company established before the Revolution and chartered in 1799, the Wadsworth Atheneum in 1842, the Hartford Hospital in 1854, the Watkinson Library 1854, and other charitable or educational and literary organizations, all of which have been liberally or exclusively aided by the citizens.

THE POST-OFFICE in this city has been moved three times in fifty years; from the old Law Building, corner Main and Grove sts., where the Putnam building now stands to the old Press building 62 State street, and from there to 9 Central row, where Central Hall now stands; and from thence to the Times building, 252 Main street.

Hartford contains the following Libraries; Trinity College, 11,000 volumes; College Society libraries, 5,000; library of Young Men's Institute, 22,000; Watkinson Library, 22,000; and 7,000 in the Theological Institute.

The street formed by the DYKE around Col. Colt's improvement is 32.50 feet above the base line of the city, which corresponds with low watermark. It is 8,698 feet long, 30 to 50 feet wide at top, having cost $80,745.35. This Dyke encloses 123 acres of land.

THE STATE HOUSE in this city was first passed upon by the Legislature in May, 1792—its erection commenced in 1794, and was first occupied in 1796, and cost $52,480.

In the Senate Chamber is a celebrated original painting of Washington, taken from life, by Stuart. Also, portraits of Governors of Connecticut, up to 1872, and the Governor's Chair, carved from the wood of the Charter Oak.

The Colt Artesian Well, began in the fall of 1868, and completed May 1, 1869, is 1584 feet in depth, and has cost about $10,000 and discharges 50 gallons of water per minute. Located rear of Mrs. Colt's residence.

Hartford paid to the State in Taxes in 1871 the sum of $571,991.61 being nearly one-third of the amount raised by taxes in the entire State in 1871, viz. $2,091,035.63.

HARTFORD CITY

Is built on a strong clay soil, but that near the river is of a rich black mold. It is now about four miles in length, north and south, by two in breadth. (The *Town* of Hartford is five and one half miles long, by three and one fourth broad.) It is located on the west side of Connecticut river, at the head of steamboat navigation, and 50 miles from its mouth, in latitude 41 deg. 45 min. 59 sec., and longitude 4 deg. 15 min. East from Washington. By railroad it is 111 miles north-east from New York and 124 miles west by south-west from Boston, and 126 miles south east from Albany, 90 miles west of Providence. The Legislature of the State meets here every other or odd year. The city is divided by Park river, spanned by 11 bridges.

The *Main Street Bridge* is of a single arch, on rock foundation and is 100 feet wide, 7 feet in thickness at the base, and 3 feet 2 inches at the center —the chord or span of it is 104 feet, and it is 30 feet 9 inches from the bed of the river to the top of the arch. Cost $31,500.

The *Front Street Bridge* cost $10,000, and was built in the year 1853; is 44 feet wide, 148 feet long,—of three free-stone arches—two of 34 feet span, and one of 35 feet—all semi-circular, and divided or supported by two piers, each six feet wide.

The *Ford Street Bridge* cost about $15,000, and was built in the year 1850; is 35 feet wide, 174 feet long, of five free stone arches,—the north and south of fifteen feet span each—the other three of 18 feet each; width of arches 26 feet; width of piers 5½ feet; height from top of center arch to top of sides, 7 feet.

The *Asylum Street Bridge*, junction Asylum st. and to west drive on Park; erected of wood, fall 1858; cost $2,500.

The *Wells Street Bridge*, from 41 Wells street to east drive on the Park; erected of wood, fall of 1858; cost $2,500.

1824, Ludlow, Haynes, Wolcott, Hopkins and Hooker, at about Brainerd a written constitution which was finished in 1639, the first ever formed in America, and which embodies the main points of all our independent state constitutions and of the Federal constitution, to that Hartford may claim to have been the model for our whole republic. A school was in operation here as early as 1659, and in 1724, sixteen pounds a year were voted to the teacher. A house of correction was in operation in 1727. It was replaced by the General Court, and erected in 1744 nearly opposite the Center church. It was from this jail that Elijah Wadsworth took the Charter, to conceal it from Andros, in 1687. The first school supported from Hartford in 1673, and founded Trinity College. Trinity succeeded one founded Middletown in 1800; another founded Norwich in the same year, and a third founded Hobart, in 1826. Hartford has sent out innumerable distinctions, and steps numerous, now alive, to all parts of the world. She has from seven hundred and fifty of her sons and daughters now living in the single city of New York. In 1670, our first school was established, by order of the General Court, which directed a teacher and an interpreter to go among the Indians twice a year to endeavor to convert them. The first printing office was set up here by Thomas Green, in 1764, who established the Connecticut Courant in October, 1764. In 1774, a small committee of enterprising men met here and made these arrangements for mining iron and money, which resulted in the taking of Ticonderoga by Ethan Allen "in the name of the Great Jehovah and the Continental Congress." In 1784 the city was incorporated. In 1792 the Hartford Bank and the Hartford Charitable Society were established. In 1799 a Wooden manufactory was started on Park river at foot of Gold street, then called Factory lane, but after that the distillery parties was abandoned as a losing business. Trinity College in 1823, the Literary for the Blind in 1833, the Hartford Society in 1838, Congregational 1839, the Orphan Asylum in 1850, the Young Men's Institute, in 1850 succeeding the Hartford Library Company established before the Revolution and chartered in 1770, the Work-work. Athenæum in 1842, the Hartford Hospital in 1854, the Work-house Library 1854, and other charitable or educational and literary organizations, all of which have been liberally or exclusively aided by the citizens.

The First Church in this city has been named three times in fifty years from the old Love building, corner Main and Grove sts., where the Putnam building now stands to Brook Street building on State street, now from there to a Central row, where Central Hall now stands; and from thence to the Trinity building, 322 Main street.

Hartford possesses the following Institutions: Trinity College, 17,000 volumes; Colleges Society Library, 8,000; Library of Young Men's Institute, 22,000; Watkinson Library, 32,000; and 1,000 in the Theological Institute.

The street formed by the Dyke around Cat Coves improvement is 2,140 feet above the base line of the city, which corresponds with the experiment. It is 8,000 feet long, 30 to 60 feet wide at top, having cost $90,145.56. This Dyke produces 120 acres of land.

THE STATE HOUSE in this city was first passed upon by the Legislature in July, 1796—the architect commenced in 1796, and was first occupied in 1796, and cost $52,000.

In the Senate Chamber is a valuable original painting of Washington, taken from life by Sharp. Also portraits of Governors of Connecticut, up to 1872, and the Governor's Chair, carved from the wood of the Charter Oak.

The Cold Aqueduct Well house in the city of 1859, and completed July 1, 1860, is 1,164 feet in depth, and has cost about $70,000 and discharges 90 gallons of water per minute. Located near St. Coll's residence.

Hartford paid to the State in Taxes in 1871 the sum of $171,921.30 being nearly one-fifth of the amount raised by taxes in the entire State in 1871, viz. $2,100,000.00.

In the winter of 1710, 1711, the Connecticut river was not frozen over below Hartford, and for several miles above this city.

Jan. 29, 1838, the steamboat Clifton arrived from and left for New York—the Connecticut river being free from ice.

There was navigation for steamboats on Connecticut river from Jan. 8, 1870, to Feb. 4, 1870—the steamer Silver Star made several daily trips between this city and Essex.

THE OAK TREE,

In the trunk of which was concealed the Charter of Connecticut from Oct. 31, 1687, to May 9, 1689, was blown down in a severe storm, Aug. 20, 1856. It stood on lot No. 29 Charter Oak avenue. This Charter was won by Gov. John Winthrop to the colonists from Charles II., King of England, April 23d, 1662, and the unsuccessful attempt to wrest the same from the State was made by Sir Edmond Andros, Oct. 31, 1687. The original Charter is in the office of the Secretary of State, framed in wood from the tree that concealed it from the minions of James II. The mode of government established by this instrument was superseded on the adoption of our present constitution, in 1818. On the 23d day of April, 1862, this Charter was 200 years old.

SEWERS,

Have been made under nearly every street in the city. In 1866 a second sewer was laid in Main st., at the depth of 14 feet, from Church st. to stone bridge, a distance of 2300 feet.

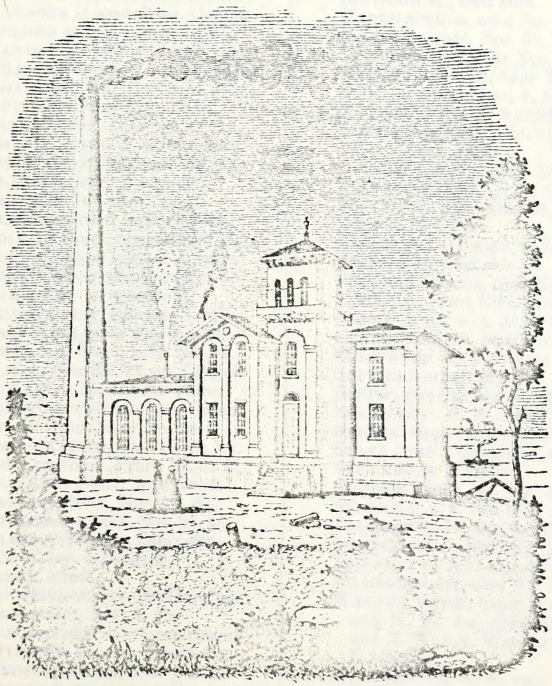
HARTFORD CITY PASSENGER OR UNION RAILROAD STATION, 182 ASYLUM STREET.

THIS building erected by the Hartford, New Haven and Springfield, and the Hartford, Providence and Fishkill Railroad Companies, is built of Portland stone, of the Italian Campenili style of Architecture, at an expense of $60,000. Its entire length from North to South is 360 feet. The front faces to the South on Asylum street, and is 94 feet in width; the corner towers thereto are 23 feet square and 76 feet in height; the smaller towers on the South are 8 feet square and 54 feet in height; the center over the arch is 32 feet wide on elevation of 42 feet; the span of the arches being 25 feet 5 inches; and the height of the arches from the track, 20 feet. The second and third stories of the front portion of the building are finished off into offices for the use of several officers for these respective companies. The center of the first stories on both sides is handsomely fitted up into Passenger Saloons. The 2d story into two refectories 20 by 84 feet.



HARTFORD WATER WORKS.

THIS engraving represents the two-story brick edifice erected, and occupied for the engine, boilers and pumps for the Water Works, as were used for twelve years for supplying this city with water from Connecticut River, and which are now kept ready for use in case of any failure of supply from Trout Brook, from bursting of mains, etc.

The Office of the Commissioners is 3 Pratt st. The Pumps, &c., 2 Water st. Surveys were commenced Oct., 1853, ground broke June, 1854, and first pumping of water Oct. 23d, 1855. The pier in the river, to protect the receiving pipe, is where at low water, there is 12 feet in depth, the water running into a well 140 feet from the river; from thence it is pumped 9 feet.

The MACHINERY used for pumping, up to Jan. 2d, 1867, 2 P. M., at which time water from West Hartford was substituted,) is four double pumps so actuated by cams as to produce a constant and uniform flow of water.

The Water Rents collected for the year ending March 1, 1872, amounted to $83,794.12; running or current expenses to $72,792.52; showing an excess of receipts over current expenses and interest of $11,001.60.

There has been laid for extension and improvement of the distribution, 13,878 feet of cement pipe, and 4,163 feet of cast iron pipe, making 3 miles and 2,201 feet added the past year, which with that laid in former years makes 51 miles and 8 feet of pipe now in use.

The number of hydrants for fire purposes now in use is 237. Nineteen of these have been added the past year.

Two hundred and fifty-five new service pipes

have been laid the past year, making the number now in use, 3,785.

Total consumption of water for the year ending March 1, 1869, was 700,000,000 gallons. Under the direct distribution from the West Hartford reservoir, it is now impossible to ascertain the exact amount used.

Reservoir No. 1 at high water flows 32 acres. Its capacity is 165,000,000 United States gallons. The altitude of the reservoir at top water above low water of Connecticut River is 260 feet, and gives a head at the State House of 135 feet more than the old works.

Reservoir No. 2, covering a water surface of 49 acres has a capacity of 229,000,000 gallons.—greatest depth 33 feet.

PRESENT LIABILITIES FOR THE WORKS.

Water Fund bonds, &c., maturing from 1879 to 1891, $738,000.00.

Police Force—Each member. Superintendent of Fire Alarm Telegraph.

These boxes are of iron and double, containing an inner box, inaccessible to any one except the superintendent or persons in charge of the telegraph. The inner box contains the electrical apparatus, necessary for giving the alarm. The outer box can be opened by a key in charge of some responsible person living near by, and a person discovering a fire will obtain this key, unlock the box, and give the alarm, which is done by simply pulling a slide. Each box is numbered, and a single pull of the silde strikes the number of the box on the alarm bell in the signal tower, and also on the gongs in the various engine houses.

HARTFORD PUBLIC HIGH SCHOOL EDIFICE.

The new Hartford High School building is located on Hopkins street, about 1000 feet south-west of the railroad station. Its external dimensions are 100 by 85 feet. It is of mixed architecture, the Norman style predominating. The foundation is of Portland Freestone; the exterior walls of Boston faced brick: window sills, belt courses, &c. of Ohio sandstone. The observatory tower is 120 feet in height. The entrance doors for the girls are on the north side—for the boys on the south side of the building. In the basement is a gymnasium for the boys 39 by 40 feet, also a play room of the same size for the girls. In the first story are four rooms 30 by 40 feet with wardrobe and reception rooms. On the second floor two rooms 30 by 40 feet; one 80 by 50 and the laboratory 24 by 30 feet, with a recitation room 16 by 30 feet. The third story is occupied by the hall or chapel 60 by 87 feet, capable of seating about 1000 persons. The building is heated by a low pressure steam heating apparatus. Thorough ventilation is secured. The building will accommodate 409 scholars. The entire cost of building and grounds has been $159,248.50.

First opened in December, 1847, corner of Asylum and Ann sts. Removed to new edifice on Hopkins st., Dec., 1869.

EDIFICE ERECTED IN 1869.

The building is four stories high, 140 feet long by 70 wide, and contains 22 school rooms, 32 by 28, all furnished with single desks and seats for 56 scholars each, and will accommodate 1,200 pupils. A clothes room is connected with each school room, furnished with water, and the same number of similar rooms is provided for teachers. There is a hall in the fourth story for the public exercises of the school. There are four entrances, two in front and two in the rear, with broad stair-ways leading up through the building to the third

story, and two leading to the hall and attic above. One half of the basement is used for play rooms for the scholars in rainy weather, umbrella rooms, etc. The other half, contains rooms for coal and "Brown's Patent Hot Water Heating Apparatus," so constructed as to warm the whole building, having four boilers, one of which is sufficient to heat it in moderate weather, the others to be used as occasion may require. Total cost of land and building, for occupancy, $185,000.

telated structure, with central towers 70 feet in height and corner buttresses 56 feet in height. The stone, which is a species of gneiss, was procured from the east part of Glastonbury, about nine miles South East of this city.

The North division, first story 13 feet high, second story 24 feet high, and both 65 feet long by 30 feet wide, is occupied by the YOUNG MEN'S INSTITUTE, for a reading room, quarterly and other meetings, and by their Library, of 22,000 volumes.

The South division is of the same dimensions as the North: used by CONNECTICUT HISTORICAL SOCIETY.

The South-east addition is occupied by the WATKINSON LIBRARY.

The central division of similar dimensions with the others, is used as a gallery of very valuable PAINTINGS and STATUARY.

The building was erected by voluntary contributions of citizens, with the land and fence, cost over $60,000.

WADSWORTH STREET SCHOOL.

THE edifice now occupied, on Wadsworth Street, which would accommodate six hundred children,—room enough, it was thought, for the prospective wants of the district—was completed in 1851, and contained *five* departments with recitation rooms for each.

The registered number in the Wadsworth Street School and its branches, in January, 1871, is as follows:

Wadsworth Street School, - -	1,380
Charter Oak, " " - - -	295
Baker Road, " - - -	111
Wethersfield Avenue, " - - -	65
Making in all, - - - - - -	1,851

In the history of this district, 1851 and 1871 were two memorable years. In 1851 the Wadsworth Street School House was built. In the estimation of many it was far too large. To-day, after repeated additions and alterations which have cost the district more than three times its first cost, it is nearly filled to its utmost capacity. The cut represents the Wadsworth Street School building as it now is, with its first, second and third story plans. It accommodates nearly three times the number of pupils it did in 1851.

The new CHARTER OAK SCHOOL HOUSE.—(South District,) in Colt's Meadow, was formally dedicated with appropriate exercises, on the 6th of September, 1871, and is all that can be desired for a first class school building. Its size is ninety-four by fifty-six feet, four stories high, with a French roof. The basement, which is eleven and a half feet high, contains play-rooms, thirty-two by twenty-six feet, and fourteen and a half feet high. The third floor is like the second, but the rooms are sixteen feet high. The fourth floor has two school rooms of the same size of those below, and a hall fifty-five by fifty-two feet. The school rooms and the hall are sixteen feet high. Each room has a separate clothes room, with water, and everything for the comfort and convenience of the school. The cost of the building, including heating apparatus, fences and side-walks, was $47,-396.77. The lot, which is inclosed by an iron fence, and surrounded with a flag-stone sidewalk, cost $2,500. Total cost of the whole, is a little less than $50,000.
